

SAVOY AMP

PRIDRANGAR

Imagine the roar of your legendary amps, mixed with the power of waves crashing against the rocks of Iceland!

A 30V headroom boost side, for even more gain, right up to the limit of stall. Its MOSFET amplification will adapt perfectly to your attack and boost the power sent through the Pridrangar's distortion stage.

On the other side, distortion inspired by the legendary Orange and Vox amps, coupled with an analogue octave up and powerful overdrive. Halfway between vintage and modern, you're sure to find your sound.

 Handmade in France.

Specifications

POWER SUPPLY:
9Vdc, 100mA, negative polarity

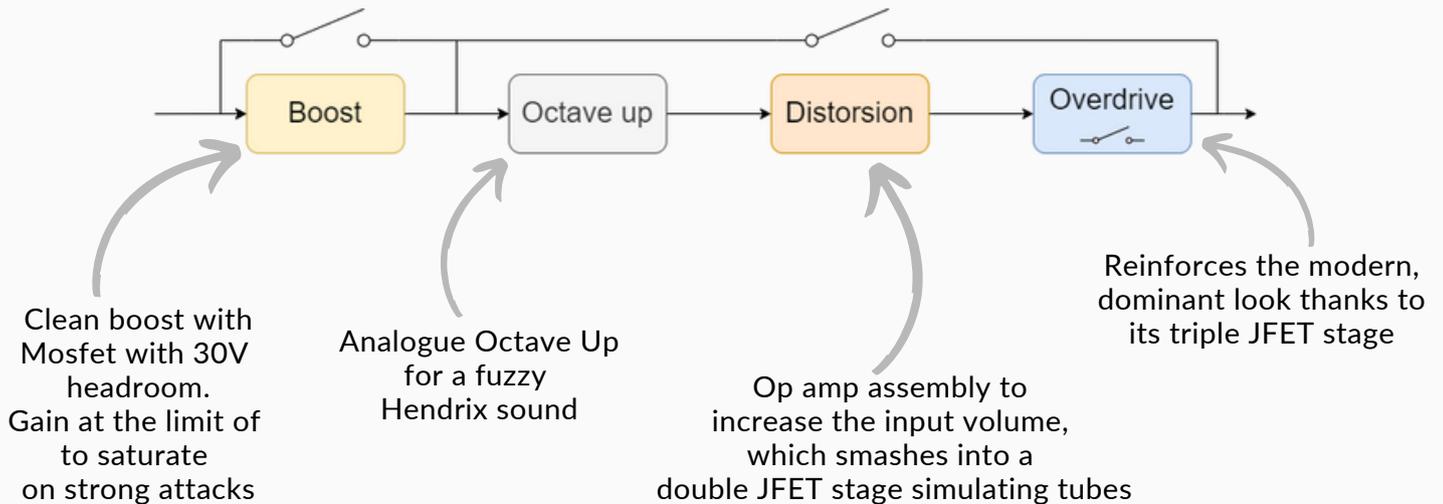

SWITCH :
True Bypass

INPUT IMPEDANCE:
1000 kΩ

DIMENSIONS (LxHx cm) :
12 x 9.4 x 3.8

OUTPUT IMPEDANCE:
100 kΩ

WEIGHT :
400 g

Settings

6.35mm JACK: Additional footswitch to activate octave up or overdrive. Parameters can be set on the top side

TONE : Attenuation of treble boost

FRONT

BOOST: Boost output volume

GAIN: Gain of distortion stage

VOL : Distortion output volume

OCT : Octave up blend

TONE : Distortion equalizer

Switch OD : Post-processing overdrive
