

Grabuge des Montagnes Tube replacement

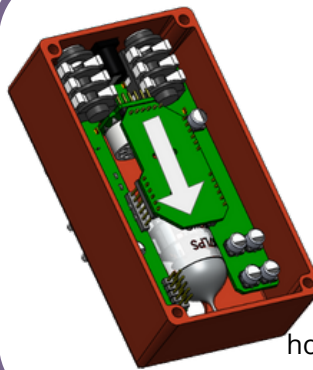

1

Remove the nut from the footswitch on the front panel and the 4 screws on the rear panel.

2

Remove the footswitch from the rear of the pedal.

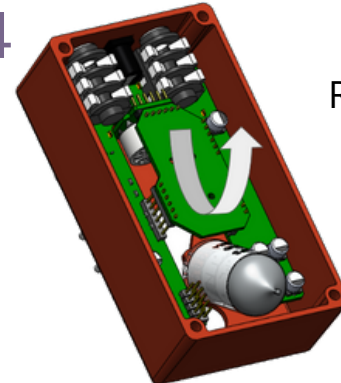

3

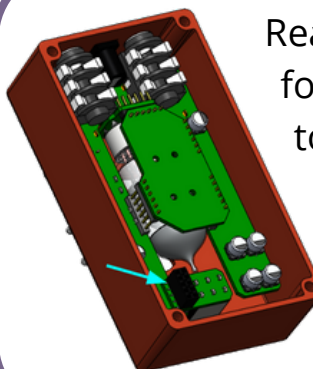

Slide the tube downwards.

You need to be patient to remove it from the socket. We recommend using the hole in the front and the end of the tube.

4

Remove the tube and replace it.

5

Reassemble the footswitch, taking care to align the two rows of connectors and insert as far as possible to lock it in place.
